Scaled agile framework exam questions and answers

SAFe Hirarchy

...the team does not provide history points in that sprint. The team does regression tests before release to production. To adapt, use a lottery system to assign every story. You share your observation with the team and invite them to own and solve the problem. Everything is estimated to increase the points assigned to the less interesting stories so that the Team can increase their velocity. Ask the Tech Lead to assign every story to a developer so that everyone gets done efficiently and with responsibility. The Quality Manager, the Product Manager, the Scrum Master, the ENGINEERING MANAGER Q60. The Agile Framework scaled claims that if you measure one thing, what should you measure? What is the best definition of history points? Q5. The team does not get credit for the points of history in its speed calculation. History is the result of the team's effort. The story should be shown to stakeholders for their feedback. These answers are updated recently and are 100% correct. Answers of Agile Methodologies Skill Assessment. A Six Sigma. A Gemba walk. A Total Quality Management. A Kaizen Q35. Use These Option to Get Any Random Questions Answer. Which choice is not a benefit generally associated with product demonstrations? What should happen if the Product Owner does not accept a story by the end of the iteration? Q24. Which choice is not a Scrum value? According to the Agile Manifesto, your highest priority is to _____. Which features should the development team work on first? A. It assigns developers to other teams in order to eliminate personality conflicts. A. It improves the functionality of the product. A. It recalibrates the success criteria for the product in the marketplace. A. It improves the design, which can lead to improved development efficiency and maintainability. Q73. Which is NOT a principle of the Scaled Agile Framework? What is the main benefit of a working agreement? Q47. Which strategy is preferred for development teams? A. Exploratory spike. A. Backlog refinement. A. Functional decomposition. A. R&D Q38. Q33. Excel file with Q&A for clearing exam easily 90% question will come from this dumps only. Q11. This dump is for Leading SAFe 5.0 Agilist. A. Burndown charts show the work remaining to be done. A. Burndown charts show the work completed. A. Burndown charts are more useful than burnup charts. A. Agile project management tools can produce these automatically. Which task is not the Product Owners responsibility? A. None. A. The Scrum Master should prioritize the work in the sprint backlog. A. The PO should prioritize the items in the sprint backlog. A. The developers prioritize work unless they cannot complete it, in which case the PO should prioritize the remaining work. A. None. A. The developers should prioritize the work in the sprint backlog. Practice from this al A. erdaus esrevid id A. ticolev al eratrnfoc rep otasu inoizarnofni id erotaidar nu A.
